

HELIOS

INTERPLANETARY
EXPERIENCE

GERMAN SPACE
OPERATION CENTER (GSOC)

The German Space Operations Interplanetary Experience: Project HELIOS

Saluting the 40th launch Anniversary of the HELIOS-I interplanetary probe, flying as close to the Sun as 0.30AU (1 AU = 150 mio km), an achievement unprecedented up to this date, the technical report summarizing 10 years of operational experience with the two sun-probes Helios-I (launched in 1974) and Helios-II (followed in 1976) of the German Space Operations Control Center (GSOC) at DLR Oberpfaffenhofen, Bavaria is provided for [downloading](#).

The book contains 198 pages - so be a little patient (2...3 min) when downloading.

Joachim J. Kehr Editor SpaceOps News and former HELIOS Operations Manager (Jan 2015)
